Genealogy

Genealogy is by far one of the most popular hobbies in the United States. Expertise and skill levels vary considerably from novice to professional genealogy gurus. Joining the DAR does not require an interest in genealogy, but it helps to have some knowledge of one's ancestry. At the very least, you will need to gather documents for yourself, your parents, grandparents and possibly great-grandparents. There are some 3,000 chapters nationally and internationally, DAR has teams of volunteers who can assist you if you need help with your research. Feel free to [contact a chapter](#) in your area to get started.

This section will help guide you through the beginning stages of your research. In addition to getting you started in gathering your documents and your initial research, these pages will help you find a chapter near you and provide an overview of our online genealogical resources.

Since its founding in 1896, the DAR Library has grown into a specialized collection of American genealogical and historical manuscripts and publications, as well as powerful on-site databases. The DAR Library collection contains over 225,000 books, 10,000 research files, thousands of manuscript items, and special collections of African American, Native American, and women's history, genealogy and culture. Nearly 40,000 family histories and genealogies comprise a major portion of the book collection, many of which are unique or available in only a few libraries in the country. The DAR Library is free and open to the public.

DNA and DAR Applications

Paternity Tests

The DAR has long accepted paternity, maternity and siblingship tests of the type used by the court system, as proof of parentage for members

Besides paternity tests, there are three types of DNA tests that are available commercially to genealogists. These include Y-DNA; mtDNA (mitochondrial DNA) and autosomal DNA tests. Each type of DNA test has its advantages and limitations. At this time, Y-DNA tests offer the most reliable means of using DNA evidence for DAR application papers. Y-DNA is passed from father to son, so only males can be tested, therefore women applying for DAR membership will need to find appropriate male surrogates to take the Y-DNA test.

Y-DNA

The DAR has accepted Y-DNA evidence in support of new member applications and supplemental applications since 2014. Y-DNA evidence submitted along with other documentation will be considered along with all of the other source documentation provided to prove heritage. Y-DNA will not be considered as stand-alone proof of lineage because while it can be used as a tool point to a family, it cannot be used as absolute proof for an individual.

Those who are interested in submitting DNA evidence as proof of lineage along with their other traditional proof documentation must submit Y-DNA test results from at least two test subjects following the criteria outlined in the Guidelines for Using DNA Evidence for DAR Applications.

Family Tree DNA – Y-DNA 37 Marker Test

Family Tree DNA, the DAR's preferred testing partner, is offering \$30 off their Y-DNA 37 Marker Test as a special DAR discount. Family Tree DNA is not the only provider of genetic genealogy tests, but they have the largest Y marker database in the world. The Y-DNA 37 test offered by Family Tree DNA includes a designated marker set that meets the reporting criteria outlined in the Test Requirements for Using DNA Evidence for DAR Applications.

Those who are interested in using Family Tree DNA results for DAR applications can visit the DAR page on their website for more information and to take advantage of this special offer:
